

INCIDENT OBJECTIVES	1. Incident Name Operation Welcome Oregon	2. Date September 9, 2005	3. Time 1300
4. Operational Period 6 hours before plane arrival, for 18 hours			
5. General Control Objectives for the Incident (include alternatives) Overall Goals: With respect and compassion evaluate displaced citizens for significant health problems and provide treatment to stabilize their health (i.e., within 48 to 72 hours after arrival) until ongoing health care access is arranged. This is primarily a triage and referral process. Minimize potential for spread of communicable diseases. Objectives: 1.) Airport screening. Encourage and provide medical screening during arrival of first ~500 displaced citizens over time period TBD. Productivity goal is to process each individual within 1 hour of deplaning. Plan design is for rate of 200 persons/hour. Adapt operations and logistics support as rate of arrival and experience dictates. <ul style="list-style-type: none"> ▪ Identify emergency and urgent medical conditions to mitigate the risk of serious physical and behavioral health complications (example conditions – diabetes, hypertension, asthma, COPD, cardiac disease, untreated/inadequately treated thought disorder, major depression, drug /alcohol withdrawal, etc.). Triage groups: <ul style="list-style-type: none"> ○ Healthy, stable; ready to go to shelter ○ Assessment/treatment ○ Communicable disease risk ○ Mental health ▪ Document medical concern and assure continuity of care. ▪ Transport to stabilization clinic as needed. Transport to hospital ER is via 911 or ambulance onsite. Transport to Shelter is arranged. 2.) Stabilization Clinic. Establish clinic to stabilize persons needing non-emergency medical treatment for at least 48 hours after arrival. (e.g., medications, counseling, etc.) Assure access to level of care including pharmacy, lab diagnostics. [Emergency treatment is provided by on-site medical staff, EMTs, and hospital emergency rooms as required.] 3.) Mental Health. Provide counseling for urgent but non-emergency treatment for at least 48 hours after arrival. 4.) Shelter site. Transfer medical info to appropriate shelter staff. Arrange isolation of potentially infectious persons (as referred through airport screening). 5.) Communications to public and shelter. Organize pamphlets, public materials, etc. Provide health messages to public and shelter through JIC.			
6. Weather Forecast for Period Not applicable.			
7. General Safety Message Respiratory isolation staff need N-95
